Fintech Business Analysis Master Class

We not only teach you Business Analysis

in the most practical way, but also give you an **overview of banking, RPA, Blockchain and Artificial Intelligence and Data Analytics.**

This program will provide you with the insights of Business Analysis Fundamentals and give you working knowledge of banking, Robotic Process Automation (RPA), blockchain and Artificial Intelligence and Analytics in Banking.

This program will also prepare you to appear for Certified Professional for Requirement Engineering (CPRE) certification from International Requirements Engineering Board (IREB).

MVLCO offers a comprehensive program extensively focused on the tasks and techniques of business analysis.

The program also covers basic banking concepts and introduces you to use of Robotic Process Automation, Analytics and Artificial Intelligence in banking domain.

The program exposes you to use of technology e.g. software tools for requirement analysis, requirement documentation, creation of use cases/use case diagrams, sequence diagrams, activity diagrams.

You will also get an overview of how banks and technology companies use Banking Industry Architectural Network (BIAN) in software development and implementation.

- Requirements Sources
- Requirements Categorization according to the Kano Model
- Document Structures
- Use of Requirements Documents
- Quality Criteria for the Requirements Document
- Quality Criteria for Requirements
- Glossary

Documentation of Requirements using Natural Language

- Language Effects
- Requirements Construction using Templates

Model-based Documentation of Requirements

- The term "Model"
- Goal Models
- Use Cases
- Three Perspectives on Requirements
- Requirements Modeling in the Data Perspective
- Requirements Modeling in the Functional Perspective
- Requirements Modeling in the Behavioral Perspective

Requirements validation and negotiation

- Fundamentals of Requirements Validation
- Fundamentals of Requirements Negotiation
- Quality Aspects for Requirements
- Principles of Requirements Validation
- Techniques for Requirements Validation
- Requirements Negotiation

Requirements Management

- Assigning Attributes to Requirements
- Views on Requirements
- Prioritizing Requirements
- Requirements Traceability
- Versioning of requirements
- Management of Requirements Changes
- Measurement for Requirements

Tool Support

- Types of Tools
- Introducing Tools
